EFFECTIVE TREATMENT *

**15 YEARS
IN DEVELOPMENT**

FUNGISHIELD®

CLEAR PROTECTIVE BARRIER TREATMENT

SPF5+= 5 Year Protection*
against mold, mildew, fungus & algae

SPF2= 2 Year Protection*
against mold, mildew, fungus & algae

Protects*...walls, patios, walkways, fences, driveways, roofs, pool decks, etc.

Works on...natural masonry surfaces - concrete, stone, tile, brick, wood, most painted surfaces, etc.

Durable, long lasting beauty...keep surfaces looking like new with a single application. Fungishield's® weatherability and resistance to U-V degradation provides for long term protection.

Saves you money...Fungishield® alleviates frequent pressure washing and scrubbing. Most dirt and debris are simply washed away by the rain or easily cleaned with a garden hose.

Guaranteed...Fungishield® is guaranteed to protect surfaces against fungus, mold, mildew and algae for 5 years. Refer to guarantee for details.

Environmentally friendly...Fungishield® is water based and contains No Fungicides.

Dries clear...and will not yellow.

Added benefits...Fungishield® resists staining and water penetration better than most water proofers and sealers. Fungishield® even resists spider webbing.

***FUNGISHIELD® IS AN EFFECTIVE LONG TERM CLEAR PROTECTIVE BARRIER TREATMENT AGAINST MOLD, MILDEW, FUNGUS AND ALGAE ON WALLS, WALKS, PATIOS, DRIVES, FENCES, ROOFS, DECKS - MOST ANY SURFACE!**

FUNGI SHIELD®

CLEAR PROTECTIVE BARRIER TREATMENT

FungiShield® SPF 5+ Technical Information

Sizes	1 and 5 gallon
Application Method	Brush, roller, spray
Color (liquid)	Milky white
Color (dry)	Clear
Gloss	Negligible on most porous surfaces. Slight gloss on smooth or painted surfaces.
Dry time at 77°F	
Dry to touch	1-2 hours
Dry to light traffic	18-24 hours
Normal coverage rate	200-300 sq. ft. per gal.
Reducer/thinner	Not applicable
Recommended clean up	Soap and water

FungiShield® SPF 2 Technical Information

Sizes	1 and 5 gallon
Application Method	Brush, roller, spray
Color (liquid)	Cloudy
Color (dry)	Clear
Gloss	None
Coverage rate	400-800 sq. ft. per gal.
Dry time at 77°F	
Dry to touch	1-2 hours
Dry to light traffic	4-6 hours
Reducer/thinner	Water
Recommended clean up	Soap and water

Represented By

FungiShield® is a revolutionary new protective barrier treatment that provides long term protection against the unsightly adhesion of mold, mildew, fungus and algae. Applied to roofs, walls, walkways, fences, decks and drive surfaces, etc., **FungiShield®** prevents the adhesion of fungus organisms, airborne contaminants (food for growing organisms) and resists moisture penetration.

FungiShield® is an environmentally responsible solution to fungus and algae problems which is water based and does not rely on potentially toxic and usually species specific fungicides, mildewcides or algacides. **FungiShield®** therefore provides a broad spectrum environmentally friendly barrier protection.

FungiShield® technology is the result of more than 15 years of research. Its effectiveness in providing long term barrier protection against mold, mildew, fungus and algae is supported by university controlled studies inside greenhouses as well as years of field use on a variety of architectural surfaces worldwide.

The **FungiShield®** technology is available in 2 formulas identified by their Surface Protection Factors (**SPF**), which includes both its years of protection and degree of effectiveness.

FungiShield® SPF 5+ is the ultimate in long term barrier protection. It is formulated with the highest grade materials available; an acrylic emulsion and specialized co-polymers, catalyzed for durability and longevity, that are resistant to weathering and U-V degradation, providing the maximum in barrier protection for 5+ years. **SPF 5+** can be applied to most any surface which will accept a water based latex coating i.e., roofs, walls, walkways, fences, decks and drive surfaces, etc. **SPF 5+** keeps surfaces looking like new for years and carries a **5 year** Surface Protection Warranty (see warranty for details).

FungiShield® SPF 2 is an economical barrier treatment for areas of moderate fungus and algae problems on masonry type surfaces, having a Surface Protection Factor of up to 2+ years. **SPF 2** retards the adhesion and build up of mold, mildew, fungus and algae using specialized retractive co-polymers without the high grade acrylic emulsion and other components which give **SPF 5+** its unequalled protection and longevity. **SPF 2** was developed as an economical treatment for large scale applications to areas of less severe fungus and algae growth. **SPF 2** also resists dirt and water born stains allowing pressure cleaned surfaces to maintain that just cleaned look for years.
