

H3OTM

GRANULAR OC

(Biodegradable and Eco-Friendly Dispersible Granule)

H3O Plus Reduces Watering Up To 50%

H3O Plus is a unique root zone moisture management product that effectively reduces the overall watering requirements of plants, shrubs, trees, turf and agriculture by as much as 50% or more. H3O Plus is a proprietary blend of the patented Hydretain® soil moisture management technology enhanced with an advanced, naturally derived soil surfactant. In combination these synergistic technologies provide unequalled water conservation and drought stress reduction through efficient subsurface soil moisture management. In addition to reducing overall water requirements, H3O Plus works to provide the proper soil moisture needed to maximize the effectiveness of most fertilizer and pesticide products.

H3O Plus Granular OC puts the power of H3O Plus in an easy to spread, environmentally friendly granule that is convenient for dry spreader applications where liquid applications are impractical or labor intensive. H3O Plus Granular OC uses a rapidly dispersing, biodegradable organic compost carrier to deliver the power of the H3O Plus technology for all types of professional applications. H3O Plus Granular OC is easily applied to localized dry spots, flower beds, around shrubs, trees and containerized plants as well as for large scale applications such as golf courses, sports fields, residential lawns and commercial landscapes, etc.

Active Ingredients: H3O Plus 25%

H3O Plus Composition: 50% Humectants (sugar alcohols, polysaccharides and neutral salts of alpha-hydroxypropionic acid), 15% non-ionic surfactant and 35% inert ingredients.

Inactive Ingredients: Granule Carrier 75%

Granule Carrier Composition: Organic Compost

Total: 100%

Product Number:

57287

Not A Plant Food.

For Use on All Types of Plants: Turf, trees, flowers, shrubs, fruit and vegetable gardens and agriculture crops, etc. - field grown and containerized.

Storage and Disposal: Store in a dry place. Keep bags closed. Dispose of in accordance with federal, state and local regulations.

Application Instructions: H3O Plus will help plants survive periods of low moisture by capturing and converting free water molecules into micro-droplets of water and making them available to the plant. Pre-stress applications are recommended for optimized plant protection, however, H3O Plus can be used any time during the plants' life cycle. Applications performed at the time of planting, seeding, sodding or transplanting will also improve plant establishment.

For Best Results: Irrigation immediately after application is recommended, however, within 3-5 days is acceptable. When watering in, it is imperative to irrigate thoroughly allowing H3O Plus to completely penetrate and saturate the root zone. This product will not become functional until it is properly watered in. To prevent mower pick-up, delay mowing until product has been watered in by irrigation or rainfall. Water thoroughly when re-watering H3O Plus treated plants. For continued effectiveness, reapply every three months or every six weeks at a 1/2 rate (after the initial full rate application). Additional applications may be required as the necessity for more frequent irrigation increases. Reapply H3O Plus Granular OC if reduction in watering is not apparent within the first two weeks. A proper fertilization program will enhance the activity of H3O Plus.

Turf: H3O Plus Granular OC can be applied to established turf, or at the time of seeding, sodding, or sprigging. The recommended application rate of H3O Plus Granular OC is 120 pounds per acre (2.7 Lbs. per 1,000 square feet). Repeat every 3 months or as needed. For greater efficiency or exceptionally difficult soils, re-apply at a 1/2 rate every six weeks following the initial full rate application.

Large Planters & Gardens (where plants are planted close together): Apply H3O Plus Granular OC at a rate of 1 pound for each 100 square feet of planter bed. Apply topically for existing beds. For new plantings H3O Plus may be mixed into soil prior to planting or spread topically after planting.

Shrubs, Individual Plants, Potted or Containerized Plants: Apply at a rate of 1 pound for each cubic foot of planting media either topically or mixed into planting media at time of planting.

Trees: Apply H3O Plus Granular OC at a rate of 1.5 to 2 pounds for each caliper inch. Apply evenly from the base of the tree just past the drip line for existing trees. H3O Plus Granular OC may be mixed with the planting media for transplanting trees or applied topically after planting and watered in.

Application Equipment and Instructions: *IMPORTANT: Apply this product with drop or rotary spreaders designed to apply granular materials. Before each application, calibrate the spreader according to the equipment manufacturer's directions for adjusting the spreader settings such that the spreader delivers the appropriate application rate recommended above. Apply this product uniformly over the lawn or area to be treated. A more uniform application can be made by spreading half of the required amount over the area and then applying the remaining half at a right angle to the previous direction. Avoid streaking or skips during application. Check equipment frequently to ensure equipment is functioning properly and applying uniform distribution of granules.

CONDITION OF SALE:

BioPro Technologies, LLC warrants that this product conforms to the analysis on its label. When used in accordance with label directions under normal conditions, this product is reasonably fit for its intended purpose. Since time, method of application, weather, plant and soil conditions, mixture with other chemicals and other factors affecting the use of this product are beyond our control, there are no warranties or representations of any kind, express or implied, concerning this product, including no implied warranty of merchantability or fitness for and particular purpose, and no such warranty shall be implied by law. The exclusive remedy against the Company for any cause of action relating to the handling or use of this product shall be limited to, at the Company's sole discretion, refunding of the purchase price paid by buyer or user for the product bought, or replacement of the product used. To the extent allowed by law, BioPro Technologies, LLC shall not be liable and any and all claims against the Company are waived for indirect, incidental, or consequential damages or expense of any nature, including, but not limited to, loss of profits or income. The Company and the seller offer this product and the buyer and user accept it, subject to the foregoing conditions of sale and limitation of warranty, liability and remedies.

40 lbs. (18.14 Kg)

Treats up to 14,800 square feet at the rate of 2.7 Lbs./1,000 sq. ft.
